

Digital Learning Strategy 2026-2028

Date:	September 2026
Responsible Governors:	Simon Gale & Holly Knight
Review in:	September 2027

1. Aims:

- Effectively support high-quality teaching and learning by providing appropriate digital devices/services.
- Effectively support wellbeing by reducing workload.
- Contribute to the school's sustainability by reducing use of paper and printing.
- Develop pupils as responsible digital citizens.
- Have the essential infrastructure and governance to:
 - have a strong digital strategy
 - make informed decisions to get the best use out of our digital technology
 - use digital technology safely and securely
 - meet the digital and technology standards.

2. The six core standards:

Core Standard	Current Position	Next Steps
Broadband internet	• The right connection type and speed for our school and a backup connection to ensure resilience and appropriate safeguarding systems. • A full fibre connection for our broadband service. • Cloud solutions use ID and access management tools. • Cloud solutions work on a range of devices and are available when needed.	•
Wireless network	• The latest wireless network standards for performance, coverage, management and security in our school. • Data protection and backup systems in place for cloud storage.	
Network switching	• Proper network switches and switching infrastructure for reliability, security and resilience.	
Digital leadership and governance	• Effective digital technology leadership and governance with roles, responsibilities and processes defined in our school. • Digital technology included in our disaster recovery plan. • Digital accessibility included in relevant strategies and policies.	• Research the current position: Staff survey pack Pupil survey pack Parent/carers survey pack • Review developments in artificial intelligence (AI) and their impact on teaching, learning and assessment. • Encourage staff to use digital solutions to reduce both paper use and workload e.g. in setting homework and providing classroom resources. • Training staff and helping them to be more confident and competent in getting the most out of the

		different features of our existing digital tools.
Filtering and monitoring	• A safe digital and online environment for our school with appropriate filtering and monitoring systems that block harmful and inappropriate content without unreasonably impacting teaching and learning.	
Cyber security	• Cyber secure, and secure user accounts and access privileges. • Digital technology licenced and kept up to date. • An annual cyber risk assessment, reviewed every term. • Plan to backup data reviewed annually.	• Create and implement a cyber-awareness plan for pupils and staff. • Use Jigsaw and the Computing curriculum to support pupils to become responsible digital citizens.

3. Our IT support:

- helps meet the digital and technology standards
- actively maintains and improves your digital technology in line with your digital strategy
- is responsive and meets agreed service expectations, and
- gives staff clear guidance and training on using technology.

4. Review:

This strategy will be reviewed annually.
